

BUILDING, ENVIRONMENTAL, MAINTENANCE

These committees cater to the physical development and facility management needs of our parish.

The building committee has been responsible for the design and construction management/supervision of all the existing buildings and infrastructure in our beautiful parish. They are presently in the process of doing same for our much needed civic center project. The committee is also responsible for all major maintenance/repair works to parish structures.

Who We Need?

Construction industry professionals who are willing to offer their skills and time in service of the parish. Architects, engineers (civil, structural, mechanical, electrical).

Construction managers, quantity surveyors, surveyors, builders, technologists, and technicians are all welcome. It is good place for young professionals to gain project experience as well as meet with and learn from some of the vastly experience hands in the parish.

Meetings:-

Periodic or Wednesdays after evening Mass and during active projects.
